Subject: EPA says Dimock water is OK

3/15/12 5:32 PM EDT

The EPA says initial results from well water at 11 Dimock, Pa., homes show no elevated levels of contamination from gas drilling. The agency said water samples from six of the 11 homes showed sodium, methane, chromium or bacteria, but at safe levels. Arsenic was found in the well water of two homes but at low levels. (AP)
